

## TOOLS NEEDED:

PHILLIPS SCREWDRIVER

## KIT CONTAINS:

HOOD PROTECTOR  
2 SELF TAPPING MOUNTING SCREWS  
2 PLASTIC SHOULDER WASHERS

- 1 Lift the hood and remove any dirt or debris.
- 2 Loosen the bolts connecting the hood and grille.
- 3 Slide the mounting tabs of the hood protector into the space between the hood and grille lining up the notches with the grille bolts. Slide the hood protector in as far as it can go. Ensure that the hood protector is centered on the hood and the outer mounting tabs are lined up with the existing holes on the underside of the hood and re-tighten the grille bolts.
- 4 Put shoulder washers onto the self-tapping screws and screw the outer mounting tabs into place on each side.
- 5 Close the hood slowly and make sure there is clearance between the hood protector and the headlights.

**CLEANING:** USE ONLY SOAPY WATER AND A SOFT CLOTH. NEVER USE PAPER TOWELS, PETROLEUM PRODUCTS OR SOLVENTS TO CLEAN YOUR HOOD PROTECTOR.
